16) ComplainEase is a robust online platform designed to streamline the process of registering and managing complaints. The website allows users to easily submit complaints by filling out a detailed form that includes categories, descriptions, and supporting documents. Key functionalities include user registration and login, real-time complaint tracking, and status updates via email or SMS. Users can view their complaint history, receive feedback from resolution teams, and provide additional information or evidence if needed. The platform also includes a search feature for browsing common issues and solutions, and a dashboard for managing and resolving complaints efficiently. ComplainEase aims to improve responsiveness and transparency in handling user grievances, ensuring a smooth.

17) VoteOnline is a secure and user-friendly e-voting platform designed to facilitate and streamline the voting process for elections. The website allows registered voters to log in and cast their votes remotely, ensuring a seamless voting experience. Key functionalities include user authentication with multi-factor verification, a list of candidates or referendum options with detailed information, and a simple, intuitive voting interface. Voters can view their voting history, receive confirmation of their submitted votes, and track the progress of the election in real-time. The platform also provides secure data encryption to protect voter information and ensures compliance with electoral

regulations. VoteOnline aims to make the voting process more accessible, efficient, and transparent, reducing barriers to participation and enhancing election integrity.

OUTPUT:

19. The farmer must send his animal's signs and symptoms to doctor in video, audio, images or text form. The doctor will receive the farmer's requests and respond. The user's data will be automatically added to the database. The farmer has to register first and has to subscribe. A farmer will freely subscribe to Govt. CVHs. He must pay a fee if he will subscribe to the private clinic's doctor. There will be two payment gateways for the farmers, bank transfer (Doctor will provide his bank information while creating his profile) and easy paisa. Doctors will provide their bank details for payments. He can also provide easy paisa account details. There will be images of influenced animals with basic diseases and their prescriptions. Based on recorded data, the system can perform an analysis that which disease attacks on pets mostly in a specific area.
